Adding Value to Your Operations

Tenaris works closely with its customers to offer comprehensive solutions to manage their tubular requirements.

Could you be getting more from your tubular products? Are you facing downtimes caused by lack of materials? Time-consuming and unsafe tube preparation at the rig? High levels of stock? Administrative back-ups, involving several suppliers?

Tenaris offers a unique range of services to make your well operations more efficient and your life easier.

True Benefits

Cost savings

Appropriate stock levels and flexibility in the supply.

Simplicity

Streamline third parties' participation. Get everything from one source, reducing processes and paperwork. One well. One invoice.

Reliability

At Tenaris, we have the capacity to handle all details throughout the different operation stages, adapting to unexpected changes in your drilling plans.

Risk reduction

Receive what you need, whenever you need it. Reduce the probability of incidents while relying on state-of-the-art products.

Improved operations

Building on its wide experience with tubulars, Tenaris offers consultancy services to make your field operations more efficient.

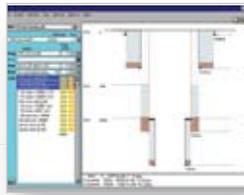

8. To rig / supply boat transportation

7. Sub-assemblies make-up
