

A man and a woman, both wearing white hard hats and high-visibility yellow safety vests, are standing on an industrial site. The woman is holding a tablet and looking at it with a smile, while the man stands next to her, also looking at the device. In the background, there is a large industrial building with the Tenaris logo and name. To the right, large industrial pipes are visible. The scene is brightly lit, suggesting a sunny day.

Welcome to Tenaris

Global leader in pipes and related services for the world's energy industry

We serve the energy market, particularly the oil and gas sector, and support our customers in the energy transition.

Why pipe matters

From the reservoir to the consumer, steel pipes are at the heart of the energy system, connecting and powering a world with ever-growing energy demands.

Watch this video to discover the vital role steel pipes play in today's world.

PLAY VIDEO

A history of industrial enterprise

1909

Seamless pipe manufacturing begins in Italy.

1935

Agostino Rocca takes the Managing Director role at Dalmine.

1954

Tamsa and Siderca start operations.

1960

Confab starts production.

1996

Dalmine, Siderca and Tamsa form DST alliance.

2000

AlgomaTubes starts operating in Canada and NKKTubes in Japan, which operated until 2022.

2001

The Tenaris brand is born.

2004

Silcotub joins Tenaris.

2006

Tenaris acquires Maverick Tube Corp. in the US.

2007

Hydril becomes part of Tenaris.

2009

SPIJ in Indonesia joins Tenaris.

2010

Threading facility opens in Saudi Arabia.

2011

New rolling mill starts production in Mexico.

2017

The greenfield Bay City mill begins operations in Texas.

2019

Tenaris acquires a controlling position in Saudi Steel Pipe.

2020

Tenaris acquires IPSCO Tubulars, strengthening its North American presence.

2023

Tenaris acquires Mattr's pipe coating business unit, Shawcor, and consolidates GPC in Saudi Arabia.

Integrated tubular solutions for the oilfield

We combine innovative technology, reliable product quality and efficient service. Our unmatched range of product solutions can meet the needs of drilling and completion operations across all applications.

At Tenaris, innovation goes beyond product technology: we are digitally integrating the tubular supply chain through our Rig Direct[®] service model. All this while maintaining the highest QHSE standards under one single system.

We offer the following products to our oil and gas customers:

Casing and tubing

Sucker rods

Proprietary connections & weld-on connectors

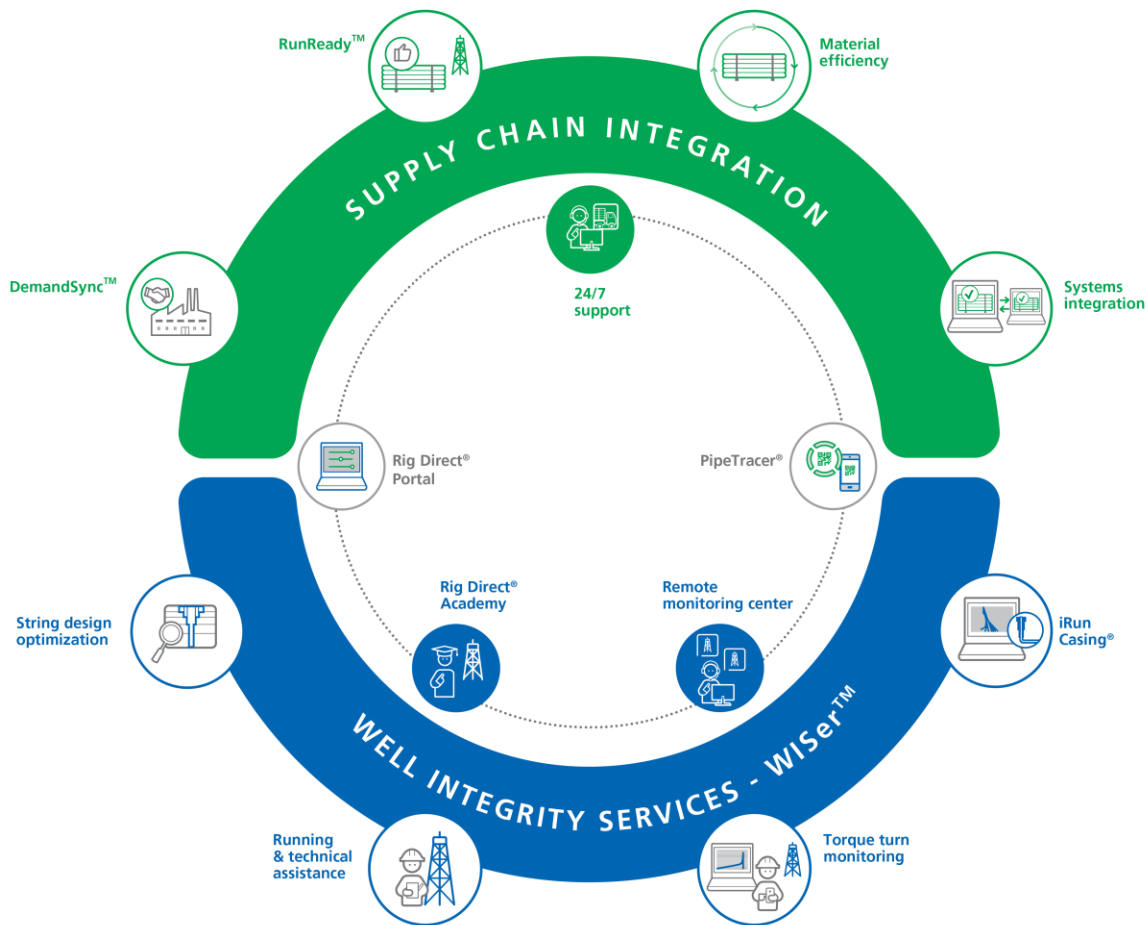

Coiled tubing

Accessories

Drill pipe

Rig Direct®

Our integrated service model improves operational efficiency, reduces costs and enhances reliability for our oil and gas customers.

Rig Direct®

Through **supply chain integration**, we align production and delivery with our customers' drilling schedules, optimizing processes and ensuring **material efficiency**. With **RunReady™**, pipes are delivered ready-to-run, reducing manpower at the rig site, enhancing safety, and lowering environmental impact. Purchasing, dispatch, and invoicing are streamlined for our clients through **systems integration**.

WISer™ consolidates Tenaris's well integrity solutions by combining technical expertise with digital tools to provide string design optimization, technical and running assistance, casing drilling service, torque-turn and real-time casing installation monitoring.

All solutions are supported by PipeTracer®, our unique pipe-by-pipe identification system, and accessible through our Rig Direct® Portal.

TenarisHydril connections

Our unmatched range of product solutions can meet the needs of drilling and completion operations -including injection wells- across all applications.

Line Pipe

Offshore and onshore solutions

We offer integrated solutions, from pipe manufacturing with precise dimensional tolerances to customized services and accessories, backed by our global, state-of-the-art industrial and R&D network, all unified under a single QHSE management system.

We provide:

Wide range of seamless and welded line pipe

Riser connections

One Line®

TenarisShawcor coating solutions

One Line[®]

We support our pipeline customers in every step of their most complex projects.

With our One Line[®] project management service, Tenaris integrates the supply of pipe with TenarisShawcor coating solutions, accessories and bends under a single responsibility, optimizing efficiencies across the supply chain.

TenarisShawcor coating solutions

Our advanced portfolio of coating solutions for offshore and onshore pipelines include corrosion protection, negative buoyancy requirements and sophisticated thermal insulation systems.

Main coating technologies:

Flow assurance

Concrete weight coating

Anti-corrosion protection

Abrasion resistance

Hydrocarbon Processing

Tenaris provides a wide range of seamless steel tubes and pipes for refineries, petrochemical and gas-processing plants.

Tenaris designed the total cost of ownership model for HPI projects, which takes into account all variables that may impact on such projects, measuring and controlling the corresponding costs.

Tenaris collaborates with engineering companies to achieve cost savings, offering:

Mill material definition of the hydrocarbon processing project

Price structure customization

Mill planning direct support

Supply chain coordination

Production flexibility

Best practices sharing

Low Carbon Energy

Our technical expertise, technological capabilities and drive for innovation power our product offer for energy transition applications.

To ensure a 360-degree approach that captures all possible synergies, we have launched a global R&D program with a special focus on the material properties required in these applications.

We provide solutions for:

Hydrogen storage & transportation

Carbon Capture Utilization & Storage (CCUS)

Geothermal

Other renewables (wind & solar)

THera™

In 2021, Tenaris launched THera™, a new brand for its proprietary materials technology and solutions for hydrogen applications.

THera™ product portfolio includes:

- High pressure storage solutions
- Modular linear storage solutions
- Transportation solutions
- Underground storage solutions

Power Generation

Innovative products and services to meet the most stringent requirements in the power generation industry (HRSG, waste-to-energy and biomass, heat exchangers and conventional boilers), offering a customized and flexible package, which allows power plant builders and owners to reduce their total cost of ownership.

High quality seamless tubes & pipes from Carbon up to advanced 12% Cr (Thor™115)

Tube length up to 26 m (85 ft)

Dedicated boiler line in Romania

Integrated industrial process from raw material to finished goods

Unique metallurgical expertise (Tenaris creep data exceed 25 million hours)

Technical consulting pre and after sale

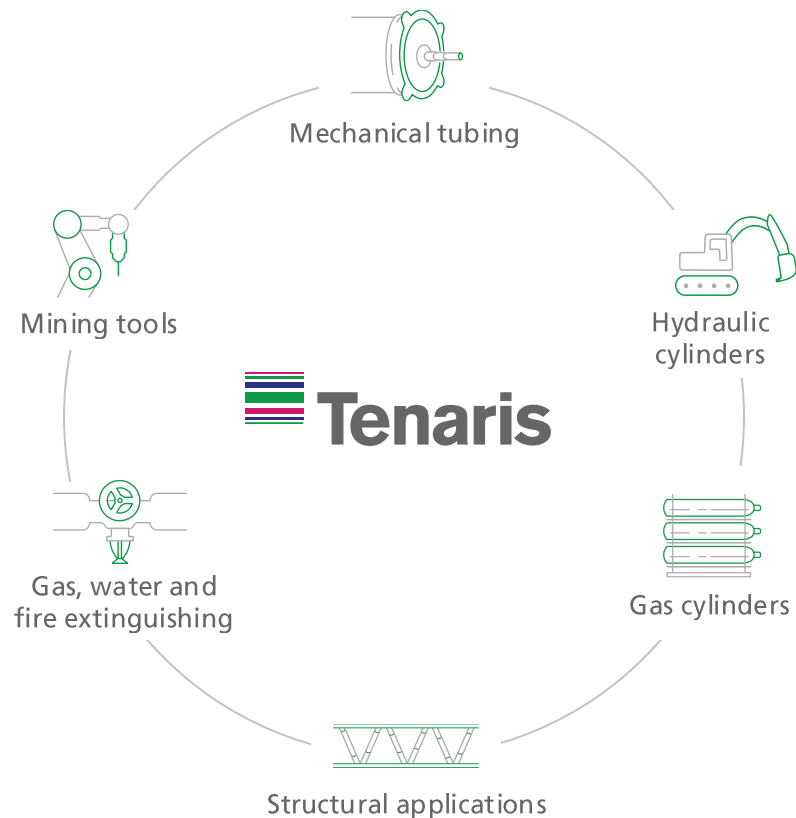

Participation to joint industrial programs: ECCC, EPRI, ASME

Industrial & Mechanical

Hot-rolled and cold-drawn seamless steel tubes and components used in mechanical engineering applications and in civil and industrial installations as well as for manufacturing earth-moving machines, architectural structures, non-oil drilling systems and gas cylinders.

In our fully-integrated manufacturing process, we focus on designing tailor-made products to meet the needs of our customers and ensure a longer product life, weight reduction, better mechanical properties and reductions in costs.

Automotive

01.

A wide range of seamless tubes and tube-based components according to IATF 16949 for car manufacturers and their suppliers.

02.

Cold-drawn and hot-rolled seamless tubes produced for application in airbags, steering, chassis and suspensions, heavy trucks and trailers, transmission, ring gears and power train components.

03.

A worldwide network of Automotive Component Centers located in Italy, Argentina, Mexico, Romania and China work with teams able to perform high added-value operations.

Sustainability Statement
2024

Quality

Quality is our main competitive advantage. We constantly seek for excellence in the quality of our products, services and processes. The requirements of our customers must be consistently satisfied. Differentiation is achieved through operational excellence, logistics efficiency and development of innovative and reliable technologies, processes, products, and services.

We are focused on the **continuous improvement** of our plants and processes and on developing outstanding **technologies** and products.

ISO 9001

Single Quality Management System

Innovation

By working closely with our customers, we focus on developing products and services that meet their needs in an evolving energy industry.

Our R&D work focuses on serving the energy industry, especially the oil and gas market, supporting our industry and customers in the transition to cleaner energy, as well as improving production processes and introducing digital solutions to create the factory of the future.

Bay City: first pipe manufacturing plant in the U.S. to receive LEED certification

Tenaris's Bay City, Texas, plant has received Leadership in Energy and Environmental Design (LEED) certification – the first pipe manufacturing facility in the United States to achieve this designation. The seamless mill was the company's first green field project in the United States and was designed and built according to the most stringent environmental and safety standards.

People & Diversity

We are committed to leading with care by providing a safe working environment grounded in our core values, where employees are empowered to grow their skills and careers while contributing to the company's goals.

We foster trust and encourage our people to drive change and innovation, embedding sustainability through transparent, effective processes and upholding a culture that respects and promotes merit, diversity, and inclusion.

TenarisUniversity

We offer continuous development programs and opportunities that encourage our people to fulfill their potential. Through TenarisUniversity, we train our employees in technical and job-specific knowledge, as well as in the behaviors and skills needed to grow as professionals and individuals.

In recent years, we have strongly reinforced content focused on leadership, soft skills, and the core competencies we consider critical for success in our company, such as collaboration, adaptability, results orientation, and methodology.

Community

We believe that the sustainable growth of our industrial project can only be achieved in tandem with progress in the communities where we live and work.

We contribute to improving all levels of education in our immediate and broader communities, with a focus on technical education.

Community relations programs:

- Education
- Arts and culture
- Social inclusion through volunteering and sports events

Roberto Rocca Educational Programs

At the heart of our education initiatives is the **Roberto Rocca Technical Schools Network**. These schools were founded to improve the level of technical education in our communities in an inclusive way, using innovative teaching methods and technologies for classrooms and laboratories. All the students receive different scholarships depending on their economical situation.

Additional programs:

- Roberto Rocca Technical Gene
- Roberto Rocca After School
- Roberto Rocca Scholarships

Transparency

We are committed to building a corporate culture rooted in transparency and integrity, guided by ethical behavior and full compliance with the law.

Our Code of Conduct expresses the company's fundamental vision and values with respect to ethical behavior and transparency, and the expectations of the values and actions carried out by everyone working for, and with, Tenaris.

We have an independently operated **Compliance Line**, a confidential communication channel available in several languages 24 hours a day, 365 days a year that allows employees, suppliers, customers and other interested parties to report irregular incidents or situations.

Our main policies:

Code of Conduct

QHSE Policy

Business Conduct
Compliance Program

Sustainable Sourcing
Policy

Human Rights Policy

Code of Conduct for
Suppliers

Code of Ethics for Senior
Financial Officers
